<b>SERVICE TYPE:</b>	24 x 7 x 4 and 9 x 5 in certain locations (12 locations)

---

### PROJECT INFORMATION:

We have been working with the client for over three years supplying specialist IT equipment to support the current infrastructure of the business.

Our client specialises in medical equipment and software with products being used in hospitals, clinics and laboratories worldwide.

7Tech were commissioned to introduce our MaintenancePro support service for many locations around Europe, covering a wide range of Cisco equipment. The client was looking to simplify their supply chain, utilising one vendor who could manage their IT infrastructure across multiple European locations.

### CLIENT FEEDBACK:

*“7Tech have been sourcing and providing us with our IT requirements for the past 3 years and the experience has been fantastic. Quick turnarounds and absolutely no issues. We have now also started to hand over the maintenance and support of our Cisco and Server equipment across our European offices to 7Tech. This simplifies the amount of vendors we need to use and with the extremely efficient service we receive from 7Tech, we have very little work to do to get this in place.”*
